

# ***ENVIRONMENTAL POLICY***

At Maicon Engineering we are committed to the preservation of our natural environment including air, water, land, flora, fauna and to the community heritage that may be affected by our business activities.

Our objective is to create a culture and environment which ensures the preservation and sustainability of the natural environment and community heritage through the provision of resources, processes, education and a demonstrated commitment to this policy.

To this end, Maicon Engineering shall implement and maintain Management Systems which:

- promote a culture in which all Maicon Engineering employees share this commitment.
- enable us to apply environmental law and customer requirements.
- through planning, enables us to minimise environmental impacts and disturbances at all levels of our operations.
- provide operational guidance in the form of procedures and instructions that ensure our activities are performed in a safe, planned and efficient manner.
- promote environmental awareness, teamwork and the participation of all of our employees.
- minimise waste production and reducing consumption by developing effective waste management and re-cycling procedures.
- actively promote recycling both internally and amongst customers and suppliers.
- enable the continual improvement and sustainability of our environmental performance including the protection of flora and fauna, the reduction of wastes and minimising our impact on the environment.
- ensure that our environmental objectives and performance are regularly reviewed for continual improvement.
